Home is where the heart is, which is why **Coaster Fine Furniture** continually strives to bring you the latest trends in indoor home furnishings. Giving you the same great value, but with a bold new attitude, Coaster has four sub brands which will simplify your shopping experience by helping you categorize products based on your lifestyle. We source design quality furniture from all over the world to make those home furnishing endeavors that much easier. So whether you like industrial chic, art deco, mid-century modern, traditional, or contemporary style, you will find something in here for every room in your home. We invite you to browse through our 2022 catalogs and find your style.

37.00”– 60.00”w x 33.75”d x 65.75”h

METAL FINISH: BLACK

PRODUCT HIGHLIGHTS

PRODUCT MATERIALS: Heavy gauge steel tubing

ABOUT COASTER® and PROP 65

Coaster is a California based company that distributes products nationwide. Most of Coaster's items are labeled with a warning from the State of California. These labels were placed on our products in order to comply with California's Safe Drinking Water and Toxic Enforcement Act of 1986, better known as Prop 65. At Coaster we are confident our products are not harmful, and also compliant with the California law. All products shipped across the US will have these warning labels.

"All Coaster items are within formaldehyde emission's safe harbor level."

Coaster Prop 65 Warning Guidelines

In compliance with California's Proposition 65 and as of August 30th, 2018, Coaster will continue marking packaged products following the new warning guidelines.

Where can I find this information?

California's Proposition 65 Law requires we list one chemical from the list of chemicals that can cause cause birth defects and one chemical that can cause cancer. Coaster's warning label for each item will contain one chemical that belongs on both lists.

Label example indicating Coaster is TSCA Title VI compliant.

WARNING: This product can expose you to chemicals including **CADMIUM**, which is known to the State of California to cause cancer or birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov/furniture

- Adhered to the furniture piece
- Affixed to the packaging carton
- You can find the chemicals listed for each item on CC3.

COASTER connect

What is Formaldehyde?

Formaldehyde is a respiratory irritant and is classified as being "carcinogenic to humans".

Where is Formaldehyde found?

Formaldehyde is found in manufactured wood products used as building materials and adhesives (glue).

Formaldehyde *meets* Furniture?

Why am I being warned about potential exposure to formaldehyde in furniture products?

Formaldehyde is a colorless and flammable gas with a strong smell. It is released into the air from some furniture products.

Formaldehyde is used in making resins that are used in adhesives for some composite wood products that are used to manufacture furniture.

Formaldehyde is found in some paints, lacquers, and finishes used to manufacture wood furniture.

QUESTIONS & ANSWERS

Q What is SB-1019 Compliancy?

A Requires labeling of upholstered furniture to disclose the presence or absence of flame retardant chemicals on furniture labels.

Q What is TB117-2013 Compliancy?

A Mandates furniture to meet certain safety standards for the flammability of upholstered furniture in California. Coaster meets all safe harbor laws.

Q WWhat is TSCA Title VI Compliancy?

A Stands for "Toxic Substances Control Act." US law that regulates the introduction of new or already existing chemicals such as formaldehyde.

Our products do not contain fire retardants such as, TDCPP &TCEP.

Our products fall within the safe harbor limits!

Did You Know???

- Not only do we test the entire product for formaldehyde, Coaster also tests all products for the following:
- **Phthalates** A huge class of chemicals, several of which have shown to have negative health impacts.
- **Lead** Lead is a highly toxic metal and a very strong poison. Lead poisoning is a serious and sometimes fatal condition.
- **Fire Retardant Chemicals** Adults, and especially young children, are particularly susceptible to the toxicity of flame retardant chemicals.
- All Coaster products have been CARB compliant for many years at the state level. All Coaster products are also TSCA Title VI compliant at a Federal level. All Coaster items are tested and within formaldehyde emission's safe harbor levels. Coaster products are also free from phthalates, lead, and fire retardant chemicals.

SB-1019 Compliant **TB117-2013** Compliant

See Q & A for more details.

PACKAGE "INTEGRITY"

Beginning in 2019, all Coaster items have switched over from ISTA-IA to ISTA-2C and ISTA-3B (For items that are 150lbs-up) testing. This ensures higher standards in evaluating the performance of a packaged product.

This process is accomplished by subjecting samples to a variety of tests such as impact, vibration, and altitude. These tests replicate real life experiences that are encountered in various distribution cycles.

Benefits include:

impact

The **impact** tests the burst strength that indicates the box's ability to withstand external or internal forces.

vibration

The **vibration** tests show the main factors affecting compression of the box caused by shock and vibration during transport.

altitude

An **altitude** test simulates the freefall of the package on its corners, edges, and surfaces dropped from a defined height.

ANTI-TIP

Case pieces under 27" tall

Under drawer glides: tested to not tip over at 50lbs

Metal side extension glides: tested to not tip at 60 lbs
Kenlin glides are also metal

ANCHOR FOR PROTECTION

Installation of Anchor Kit is Required Included in our product 30" tall

To help avoid the item tipping over:
Place heaviest items in the lowest drawers.

Do not set TVs or other heavy objects on top of the product unless specifically designed to do so.

Never allow children to climb from or hang on drawers, doors or shelves.

Never open more than one drawer at a time.

Do not alter or remove any drawer glide system.

Use of tip-over restraints may reduce, but not completely eliminate the risk of tip-over.

CHILD SAFETY

CLIMBING MAY RESULT IN SERIOUS INJURY
